Noushin Fatema

Junior Frontend Developer

+880 1327673419 — noushinfatema788@gmail.com — Chattogram, Bangladesh

GitHub Profile — LinkedIn Profile

Career Objective

Motivated and detail-oriented Junior Frontend Developer with a B.Sc. in Computer Science & Engineering and a strong technical foundation in React, Next.js, TypeScript, and Tailwind CSS. Passionate about building responsive, user-friendly web applications while actively engaged in audio deepfake detection research. Seeking to leverage frontend engineering skills to deliver impactful web solutions in a collaborative development environment.

Skills

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS
- **Backend & Databases:** Node.js, MongoDB, Better Auth, REST APIs
- **Core Languages & CS:** Python, C, Data Structures & Algorithms, Operating Systems
- **Tools & Workflow:** Git, GitHub, NPM, VS Code, Linux/Shell Scripting
- **Interpersonal Skills:** Problem Solving, Analytical Thinking, Team Collaboration, Peer Mentorship

Publications & Research

- **Research Paper on Audio Deepfake Detection** [Publication Link]
  Published undergraduate research focusing on audio deepfake detection, evaluating deep learning architectures and feature representations to address out-of-distribution generalization gaps.

Projects

FitLog — GitHub Repository — Live Demo
Overview: A fitness tracking web application built to help users log daily workouts, structure custom exercise routines, and monitor physical progress over time.

- Developed an interactive dashboard for logging daily workout sessions and displaying activity statistics.
- Implemented dynamic routine builders with real-time updates using React and TypeScript.
- Designed a responsive, mobile-first user interface styled with Tailwind CSS for seamless cross-device usage.
- Integrated state management and data persistence for seamless user tracking across sessions.

Grocery Market Prices — GitHub Repository — Live Demo
Overview: A dynamic web platform designed to browse, search, and compare local grocery commodity prices and market trends.

- Built a real-time product search and category filtering system for rapid commodity price lookup.
- Implemented an interactive price comparison feature allowing users to evaluate rate variations across markets.
- Engineered a clean, intuitive layout using modern CSS/Tailwind components to optimize readability.
- Created watchlist functionality enabling users to save and track daily essential items.

Education

International Islamic University Chittagong (IIUC) Graduated 2026
B.Sc. in Computer Science & Engineering *Chattogram, Bangladesh*

Extracurricular Activities

- **Active Member – RICH Club:** Participated in non-profit social welfare programs, community development, and societal improvement initiatives.
- **Peer Mentorship & Coding:** Mentored university peers in data structures and OS lab coursework while participating in competitive programming contests.

Languages

- **English:** Full Professional Proficiency
- **Bengali:** Native Proficiency
